York County Solid Waste Authority Safely Destroyed 4.15 Tons of Medications in 2018

The York County Solid Waste Authority (YCSWA) disposed of a total of 4.15 tons of unused and expired residential medication collected via the Authority's Secure Medication Take-back Box Program, community drug take-back events and illegal drugs delivered by law enforcement for destruction.

Currently, 17 York County police departments partner with the YCSWA to host medication take-back boxes in their police department lobbies. The Secure Medication Take-back Box Program provides a secure disposal option for unwanted medications from residential sources at no cost to the public or to law enforcement agencies. All York County police departments have been invited to participate.

The secure medication take-back boxes, purchased by YCSWA from MedReturn, work like a mailbox: once medications are deposited, they cannot be retrieved and are contained in a locked compartment accessible only by law enforcement. The heavy-duty green metal box bolts to the floor and wall. Medications collected in the take-back box program are delivered by law enforcement to the Authority's waste-to-energy facility for safe and complete destruction. Law enforcement also maintains the box and secures medications that are received until they can be destroyed.

Northern York County Regional Police Department (NYCRPD) was the first police department in York County to host a MedReturn take-back box. Says Chief Mark Bentzel: "This program enhances our ongoing efforts to eliminate drug abuse by providing a safe means of disposing of drugs and presenting an opportunity to educate the general public about the potential for abuse of medications".

The Authority's waste-to-energy facility is equipped with state of the art combustion technology and air emission controls making it York County's best waste management tool for destruction of medications and illegal drugs seized in law enforcement actions. The facility's operator, Covanta York Renewable Energy, also supports this method that ensures complete destruction of medications and illegal drugs at the York County Resource Recovery Center.

Notes Dave Vollero, Authority Executive Director, "Using waste-to-energy technology to destroy medications and illegal drugs keeps them out of landfills and waste water treatment systems. We have long advised residents to make medications unrecognizable and unpalatable and place them out with their regular garbage for delivery to our facility. For those residents not comfortable with placing medication out at the curb, the take-back box program offers a convenient and secure option that achieves the same results: safe management, complete destruction and production of alternative energy."

Residents interested in dropping medication at a take-back box location should remove their personal information from containers before depositing them in boxes. ONLY RESIDENTIAL prescription medications are accepted. Pet medications are also accepted. Pharmacies, hospitals and other commercial sources of medications are not eligible to participate. Syringes and other "sharps" are not accepted in this program. The public may deposit unwanted medications anonymously in the take-back boxes during lobby hours as listed below, except on holidays.
